## Overview

This is the official RXC Games Litepaper.

RXC Games is a crypto gambling platform set to change the world of crypto gambling.

Ultra fast BSC transactions with low fees ensure complete joy of playing.

We will keep this paper short (and fun). The platform will contain over 4000 casino-style and quality games to be played with our token RXCG. Further integration of other tokens is planned after launch.

## Goals

1. Create a unique gaming experience and introduce Blockchain technology to users in a fun way.
2. Eliminate unnecessary complications to simplify casino games for the crypto scene through ease of UI and unified token.
3. Build a huge community around our platform and its native token.
4. Make RXCGames a brand and a recognisable platform all around the globe.
5. No KYC, no geo-restrictions - everyone is welcome.
6. To have a shitload of fun :) !

## RXCG Token Usecase

1. As we already mentioned, RXCG is a native token for our platform, built on the BSC network, due to fast transaction speed and low fees.
2. RXCG holders will be able to use the token to play all the games available on the platform and receive prizes.
3. We will use RXCG for marketing to make a worldwide brand for our platform.
4. In the end, the plan is to be able to trade this token like any other, and it will be available on some of the biggest decentralized and centralized crypto exchanges in the world.

## Tokenomics & Spec
